INTERPET

## About Us

Interpet was founded by Dr Neville Carrington, it all began as a hobby...

Dr. Neville Carrington inherited an interest in fish from his father, O.L. Carrington who had been an avid fish keeper since the 1930s. In the early 1950s a suggestion was made to Neville and his father – why not formulate a liquid food for fish?

Neville, who was studying towards a pharmaceutical degree at the time, worked out a formula during a family holiday. As soon as he returned home, production began; inside the garden shed in a washing boiler using equipment Neville had designed and made himself...

The liquid fish food, now known as Liquifry was put into milk churns and filled either above his Father's pharmacy or, during busy times, in the garage! In creating the first range of liquid fish food, Interpet Ltd was born.

Since then we've grown into a large pet and aquatics product manufacturer. We have continued to grow Mikki, our largest pet brand and have been really busy developing the aquatic side of our business under the Interpet and Blagden brands to what you see today.

The noughties have proved to be exciting times...

In 2004 Central Garden and Pet noticed us and impressed with our success decided they wanted us to be part of their family of brands and took us under their umbrella. This built our business further, with us gaining the exclusive UK distribution of some of the USA's biggest aquatic and pet accessory brands – Nylabone, Kaytee and Kent Marine.

In 2018 Interpet turned 65 years old. In these times, this is a significant achievement and we are committed to delivering great market innovations, creating intuitive packaging and merchandising solutions.

Today at Interpet, we continue to develop products for pets and their owners with the same passion and creativity that Neville first did – striving to make pet keeping more enjoyable and rewarding for everyone.

Through innovation and expertise, we make  
**Caring for creatures at home,**  
more enjoyable and successful for everyone

Since 1991 Investors in People has defined what it takes to lead, support and manage people well for sustainable results. With a community of over 14,000 organisations across 75 countries worldwide, successful accreditation against the Investors in People Standard is the sign of a great employer, an outperforming place to work and a clear commitment to success.

Interpet's Investors in People journey began in 2012 when we committed to working with the standard. Our first assessment, against the 5<sup>th</sup> Generation Standard, took place in 2014 when we were recognised as achieving Investors in People Core Standard. In 2015, we opted to be re-assessed and were delighted to be recognised as Investors in People Silver, a standard achieved by a mere 15% of the Investors in People Community.

## Manufacturing

Interpet has been manufacturing liquid and powder products to the pet industry for the past 60 years. We operate to GMP standards and are registered with the Veterinary Medical Directorate (VMD) to produce liquid medicines for the Pet Aquatic trade.

Our capability is in the blending of bulk liquids and powders to fill a variety of bottles ranging from 25ml up to 10 litre jerry cans. This also includes the filling of 1,000 litre IBC's. Our powder filling operation ranges from small 100g bags to 10kg tubs.

The production facility is supported by an on-site Quality department with full laboratory services to provide quality and consistency using full batch control and traceability systems. Our 6,000ft warehouse facilities are adjacent to the factory providing storage for both components and finished goods if a complete filling, storage and distribution service is required.

## Distribution

Interpet has been working closely with Great Bear for over 10 years. Great Bear is a leading 3rd party UK logistics business providing nationwide dedicated and shared user warehousing and distribution solutions. They operate in excess of 7 million sq. ft. of warehousing and operate a large modern commercial vehicle fleet.

## 100% Natural Barley Straw

For treatment of string algae, green water and blanket weed in ponds

- 4 convenient bale sizes available
  - Twin Pack Treats 2 x 1,125 litres (250 gallons)
  - Mini Bale Treats 4,500 litres (1,000 gallons)
  - Medium Bale Treats 9,000 litres (2,000 gallons)
  - Large Bale Treats 13,500 litres (3,000 gallons)
- A safe and natural solution
- POS display offers available

1057158	Barley Straw Twin Pack
1054645	Barley Straw Bale Mini
1054652	Barley Straw Bale Medium
1054669	Barley Straw Bale Large

Dump bin POS available

## Wildlife Barley Straw Bugs

Works like barley straw without the bales

- Treats green-water and blanketweed
- Falls outside of the biocides regulation that removed Barley Straw Extract
- The perfect replacement for Barley Straw Extract

**NEW**

2845	Wildlife Barley Straw Bugs 250ml
2846	Wildlife Barley Straw Bugs 500ml
2847	Wildlife Barley Straw Bugs 1000ml

## Blanket Weed Algaway

The easy answer to blanket weed

- Easy dose tubs with clear consumer packaging
- No cloudy water with our effective blend of minerals and enzymes
- No need to switch off UV
- Dose weekly or add when required
- Simple to use, add to a bucket of pond water, distribute over the pond surface

2758	Pond Blanket Weed Algaway Small 623g
2759	Pond Blanket Weed Algaway Large 2610g

Treatment FSDU available

## Green Away

Green Away is a naturally safe treatment for green water problems in a pond environment. It removes the suspended algae (which cause the green water) by clumping them together so that they either drop out of suspension or are trapped in the mechanical filtration media in your pond filter.

2673	Green Away 250ml
2683	Green Away 500ml
2674	Green Away 1 litre

## Fresh Start

Should be used for treating tap water to make it safe for use in a pond containing aquatic wildlife. It removes toxic chlorine and heavy metals whilst adding Aloe Vera to protect fish

**LINK SALE** – Should be sold with every new pond and large water changes after medication use.

2670	Fresh Start 250ml
2682	Fresh Start 500ml
2671	Fresh Start 1 litre

## Wildlife Pond Tapsafe

Should be used for treating tap water to make it safe for use in the pond. Wildlife Pond Tapsafe protects all pond wildlife and remove harmful chlorine and heavy metals from tap water

2650 | Wildlife Tap Safe 250ml

## Bio-Start

Supplies the family of good bacteria to the pond reducing the time it takes for the ecosystem to establish by 50%.

**LINK SALE** – should be sold with every new pond, new filter, after every disease treatment and in the spring to boost good bacteria levels

2721	Pond Bio-Start Carton
2720	Pond Bio-Start Sachet (display box of 20)

## Wildlife Bio-activator

A liquid alternative to Bio Start

2647 | Wildlife Bio-activator 250ml

**Treatment FSDU available**

## Sludge Buster

A unique blend of bacteria and enzymes that actively consume organic sludge and so takes the hard work out of keeping your pond clean and healthy.

Can also be added to filters to reduce maintenance.

## Wildlife Sludge Control

A liquid alternative to Sludge Buster

2644	Wildlife Bioactive Sludge Control 250ml
2724	Pond Sludge Buster Carton
2723	Pond Sludge Buster Sachet (display box of 20)

## Clear Pond

Clear pond rapidly clears green, cloudy, dirty or milky water by clumping together suspended particles causing them to sink or become trapped in the filter. Clear Pond's formula is naturally safe and enhances mechanical filtration in your pond

2738	Clear Pond 250ml
2693	Clear Pond 500ml
2739	Clear Pond 1 litre

## Duckweed Buster

Duckweed Buster controls duckweed using natural bacteria and enzyme cultures which gradually and safely starve the duck weed algae of essential nutrients.

2764	Duckweed Buster 250ml
2765	Duckweed Buster 500ml
2766	Duckweed Buster 1000ml

## Pond Balance

The best selling blanket weed treatment of the last decade. Very effective – changes the salt in the water making it impossible for blanket weed to repair. Easy to use – simply spoon the pink salt into a bucket of water and stir. Long lasting – regular monthly repeat doses during the growing season ensure your blanket weed never returns.

2716	Pond Balance Standard
2719	Pond Balance Value Pack
2717	Pond Balance Medium
2718	Pond Balance Large (9.34kg)

Treatment FSDU available

**Blagdon**

## Feature Algae Control

Feature Algae Control will reduce the occurrence of unsightly green water, slime and blanket weed in free standing water features. This treatment should be used monthly to prevent build up of algae and keep your water feature crystal clear

2745 | Feature Algae Control 250ml

## Feature Clear

Feature Clear will control and clear free standing water features of all common forms of unsightly and smelly bio-fouling such as cloudy water. This treatment should be used monthly to prevent a build of waste and keep the water crystal clear

2741 | Feature Clear 250ml

## Feature Surface Cleaner

Multi surface spray for cleaning water features of lime scale and grime. Safe to use on resin, concrete, metal and stone

2747 | Feature Surface Cleaner

## Feature Clean Away

Keeps Features Clear of Green water, dirt and algae  
A great ongoing maintenance treatment

2749 | Feature Clean Away

## Feature Rapid Clean

A fast and effective one shot treatment  
for green water, dirt and algae

2752 | Feature Rapid Clean

## Flora Boost

An essential trace element product ensuring that all water garden plants grow healthily and flower freely. Supplies key chelated iron in a form that can easily be taken up by plants – give this product its unique purple colour.

2697 | Flora Boost 250ml

## Ammonia Remover

Instantly reducing high levels of Ammonia which is toxic to all the aquatic wildlife in your pond. Dangerous levels of Ammonia can only be identified with a pond test kit.

2633 | Pond Ammonia Remover 500ml

## Stress Away

Stress Away should be used as a disease preventative to support pond fish when there natural ability to fight disease is compromised by stress for example through situations such as: introducing new fish, temperature changes during spring and autumn and times of bad water quality.

2754 | Stress Away 250ml

2755 | Stress Away 1000ml

## Pond Guardian Tonic Salt

This is a physiological salt based around the 4 major salts that freshwater fish need to thrive. By adding salt to a pond you relieve stress (Osmotic) on the fish.

The Methylene blue in the product allows nitrite from water to be removed. It can be used to support other treatments such as Anti Parasite. Acts as a pH buffer, prevents damaging swings in pH whilst maintaining neutral stable levels for pond fish.

2695 | Pond Guardian Tonic Salt 500 Gallon size 2.27kg

2694 | Pond Guardian Tonic Salt 2000 Gallon size 9.08kg

## Anti Parasite

An effective parasite treatment that builds treatment levels in a pond over 5 days to eliminate the parasite problem. This formula is better for fish that are unwell, as it does not hit them hard with strong chemicals in a large one off dose that could kill them. Suitable for all pond fish.

## Anti Parasite Extra Strength

A slightly stronger formulation that is suitable for only Koi and Goldfish species, as these are more resilient than other pond fish species.

2680	Anti Parasite 250ml
2691	Anti Parasite 500ml
2681	Anti Parasite 1 litre
2804	Anti Parasite Extra Strength 250ml
2805	Anti Parasite Extra Strength 1 litre

## Anti Fungus And Bacteria

A combined product as body fungus and mouth bacterial infections are impossible to distinguish by looking at. A blend of ingredients built over 5 days to minimise fish stress and maximise effective treatment.

## Anti Fungus And Bacteria Extra Strength

A slightly stronger formulation that is suitable for only Koi and Goldfish species, as these are more resilient than other pond fish species.

2678	Anti Fungus and Bacteria 250ml
2690	Anti Fungus and Bacteria 500ml
2679	Anti Fungus and Bacteria 1 litre
2808	Anti Fungus & Bacteria Extra Strength 250ml
2809	Anti Fungus & Bacteria Extra Strength 1 litre

**Blagdon**

## All In One Treatment

All in One Treatment is an effective all round formula which treats most commonly occurring parasite, fungus and bacteria problems in all types of pond fish.

2767 | All in One Treatment 250ml  
2769 | All in One Treatment 1 Litre

## Pond Health Test Kits

This simple test kit economically tests for each of the essential water parameters required For good pond keeping. The enclosed leaflet recommends easy solutions to keep your pond healthy.

2777 | Pond Dip Strip Test Kit

## Anti Ulcer

A unique patented, formulation that treats internal systemic bacterial infections in ornamental pond fish, killing both *Aeromonas* and *Pseudomonas* bacteria. The symptoms include swollen eyes, swollen body (Dropsy, the scales stick out like pine cones), sunken belly and ulcers and red sores on the side of the body. Often benefits from a follow up treatment of Anti Parasite as the wounds are often cured of bacterial infection, but the infected site attracts parasites.

2734 | Anti Ulcer 250ml  
2692 | Anti Ulcer 500ml  
2735 | Anti Ulcer 1 litre

## pH Adjuster For Alkaline Ponds

Alkaline pond water (pH 7-14) can be caused by using cement around the pond that drops into the water or calcium rich rock around the edge of your pond that allows rain to run over it and into the pond . Once this gets above pH 8 it needs reducing to keep the pond water safe. This easy to use product adjusts the pH to keep it safely in the 'Safe range' for a pond between 6.5 and 8.0. (pH must be stable within this range)

## pH Adjuster For Acid Ponds

Acid pond water can be caused by a high level of organic waste, soft water with low pH out of your tap, excessive use of rain water. When your test kit shows your water is too acid, this product adjusts the pH to keep it safely in the 'Safe range' for a pond between 6.5 and 8.0. (pH must be stable within this range)

2714 | pH Adjuster for Alkaline Ponds  
2713 | pH Adjuster for Acid Ponds

Enjoy the sight and sound of moving water and aquatic life, day and night all year round

- Complete kit up and running in less than 5 hours
- Perfect for fish and plants, life support system included
- Easy to set up and maintain
- Beautiful fountain or waterfall displays LED lit

1056137	Amphibious IQ 6000-12000

## DIGITAL MOTOR TECHNOLOGY

Digital motors convert less electrical energy to heat than conventional pump motors, saving energy. Microprocessor control and monitoring allows for a host of convenient and energy saving features for your pond or water feature.

### Motor protection system

If the pump detects that the motor is clogged or jammed, it will pause and display scrolled text:

**MOTOR JAMMED, CLEAN IMPELLER, CLEAN MOTOR...**

When the clogging is removed the pump can safely restart.

### Run dry protection system

If the pump detects it has run out of water it will pause and display scrolled text:

**WATER LOW, ADD WATER...**

When water is added the pump will safely restart.

### Flexible power usage control and display

Stop, start, increase or decrease power and flow at the push of a button for optimum performance and maximum energy saving.

### Soft start

When the pump is turned on, the flow will slowly increase to its pre-set position. This reduces pump wear and reduces stresses on pipework and filters fitted to the system, decreasing the risk of leaks and damage.

## Inpond 5in1 and 6in1 Filters

The Blagdon Inpond All-in-One pump has everything you need for a clear and healthy pond, combined in an efficient pump and filtration package.

- Low running costs
- 1.25m (4'1") - 2.0m (6.6") max pumping height
- 13m cable
- 5 watt & 9 watt UV lamps
- Low voltage pump/filter includes:
  - \*3-4 attractive fountain features (dependent on model)
  - \*Mechanical & biological filter
  - \*Polymer wool cartridge
- Automatic night time pivoting feature LED spot light (except the Inpond 5in1 2000 which is manufactured to stay on)

## Clean Pond Pods

Quick and easy, 5-in-1 water treatment to tackle the most common pond problems. Effective against blanketweed/string algae, consumes sludge, makes tap water safe and feeds aquatic plants.

- 3 pack sizes available
  - 6 Pack treats 3 000 litres (660 gallons)
  - 12 Pack treats 6 000 litres (1,320 gallons)
  - 24 Pack treats 12 000 litres (2,640 gallons)
- Reduce filter cleaning
- Clear blanket weed
- Eat pond sludge
- Make tap water safe
- POS display offers available

2831	Clean Pond Pods - 6 Pack
2832	Clean Pond Pods - 12 Pack
2833	Clean Pond Pods - 24 Pack

2. Venturi aeration chamber adds bubbling oxygen rich water to the filter, creating the ideal environment for friendly bacteria that keep ponds healthy

1. Built in green water clarifier UVC light guarantees algae free clear water

3. Easily cleaned, 'lift out', Hydroscreen stainless steel pre filter. Catches large waste and debris.

4. Open cell foam in three reducing grades catches dead algae dirt and waste giving a crystal clear pond.

5. Professional Ceramic Biological Media supports large populations of friendly bacteria, enabling high stocking levels of fish and pond life.

Transparent filter for illustrative purposes only. Products is manufactured in Blagdon grey

6. Replaceable polymer wool pad polishes the water quickly removing particles that create cloudiness.

7. Replaceable carbon impregnated foam removes chemical pollutants for sparkling clear water.

# Minipond and Midipond Filters

- Updated product and packaging
- Now ready assembled
- Clear water guarantee
- Increased guarantee to 3 years
- Low maintenance
- Hinged lid for ease of access

## Minipond

- Unique 6 stage filter design
- 5 watt & 9 watt UV clarifiers
- 5 m cable

## Midipond

- Unique 7 stage filter design
- 18 watt & 24 watt UV clarifiers
- 5 m cable

# Ceramic Bio Media

- Ideal for all pond keepers especially Koi
- For systems with high stocking densities
- High surface area with extreme porosity
- Can be used as aquarium/marine filter media

## Powersafe

### EXTRA SAFE

- Individual fuses to provide overload protection
- Weatherproof for outdoor use (IP56)
- Specifically designed to protect equipment from failure
- Double pole switch gives electrical isolation when switched off

### EASY TO USE

- Easy to see LED indicator lights
- Unique at a glance power status indication

### EASY TO INSTALL

- Large housing with simple to remove circuit board for easier wiring.

### Kit also includes:

- Wall bracket, wall fixings, screwdriver, spare fuses and switch labels.

### Power Supply Status

#### GREEN LIGHT

Switch box mains supply on

### Individual switch power outlets

#### GREEN LIGHT

Switch on, power supply on

#### RED LIGHT

Switch off, power supply on standby

#### NO LIGHT

Switch on or off. Fuse has blown, no power.

## Powersafe Plug And Socket System

- Safe pond-side and garden electrical connections
- Weatherproof connection IP56
- Live socket blanking cap
- Integrated cap tool with ergonomic design

1052290 | 3w Ultra Bright LED

## 1 watt LED Light Set

- Economical LED lighting
- Submersible or external use
- Easy to install
- Safe low voltage

### ACCESSORIES SUPPLIED

This pack also includes 3M of mains cable and 9M of low voltage cable.

1057004 | LED Pond & Garden Lights 3x1W  
1057011 | LED Pond & Garden Lights 5x1W

# pond oxygenator kit

increases oxygen for a healthy pond

**Single Air Stone**  
**SMALL POND**

Dimensions: (approx)  
1.8m(L) x 1.2m(W)  
x 46cm(D)

Will aerate and circulate  
a pond with the maximum  
volume of **1,000 litres**  
(220 gallons)

**Twin Air Stones**  
**STANDARD POND**

Dimensions: (approx)  
2.4m(L) x 1.1m(W)  
x 75cm(D)

Will aerate and circulate  
a pond with the maximum  
volume of **2,000 litres**  
(440 gallons)

**Four Air Stones**  
**MEDIUM POND**

Dimensions: (approx)  
3.5m(L) x 1.5m(W)  
x 75cm(D)

Will aerate and circulate  
a pond with the maximum  
volume of **4,000 litres**  
(880 gallons)

Outdoor weatherproof water garden air pump

- Increases oxygen in warm weather
- Complete kit includes air pump, airline and air stones.
- Easy change diaphragm for maintenance

## 1800

6 outlet air pump

**LARGE POND**

Will aerate and circulate a fish pond with Koi up to a maximum volume of **5,000 litres (1,100 gals)**

### TECHNICAL DATA

- 230 Volts
- 50Hz
- 16 Watts
- Maximum flow rate: 1800 ltr/hr (396 gal/hr)
- Maximum pumping depth: 2.2m (7'2")
- 0.022 MPa
- Cable 5 metre (16'4")

## 2400

10 outlet air pump

**LARGE+ POND**

Will aerate and circulate a fish pond with Koi up to a maximum volume of **7,500 litres (1,650 gals)**

### TECHNICAL DATA

- 230 Volts
- 50Hz
- 20 Watts
- Maximum flow rate: 2400 ltr/hr (528 gal/hr)
- Maximum pumping depth: 2.8m (9'2")
- 0.028 MPa
- Cable 5 metre (16'4")

## 3600

20 outlet air pump

**EXTRA LARGE POND**

Will aerate and circulate a fish pond with Koi up to a maximum volume of **11,000 litres (2,420 gals)**

### TECHNICAL DATA

- 230 Volts
- 50Hz
- 32 Watts
- Maximum flow rate: 3600 ltr/hr (792 gal/hr)
- Maximum pumping depth: 3m (9'10")
- 0.030 MPa
- Cable 5 metre (16'4")

## Pond Oxygenator 1800, 2400 & 3600 models

**Adds Essential Aeration For A Healthy Pond,  
Specifically Designed For Larger Ponds**

- Outdoor weatherproof water garden air pump.
- Increases oxygen in warm weather.
- Helps prevent freezing during the winter, reducing the potential build up of toxic gases.
- Treatments and medications can reduce oxygen levels in your pond. Support your fish with additional aeration and circulation when they need it most.
- An economical method of water movement and circulation.

### When?

Aqualibrium First Aid Salt Additive is one of the fishkeeper's most versatile water treatments. It can be used in a variety of ways:

- As a general aquarium tonic
- As a mild pH buffer
- To help minimise the effects of stress on aquarium fish
- As a supportive measure when treating for disease

0521 | IP Treat Aqualibrium Salts 265g

50525 | IP Treat Aqualibrium First Aid Salt 780g

# Help your fish stay healthy

### Top tip...

...Fish disease is often caused by poor water quality. Use our Complete aquarium dip test kit to ensure your aquarium water is healthy.

### When?

Use this treatment monthly as a preventative or when you notice any of the following:

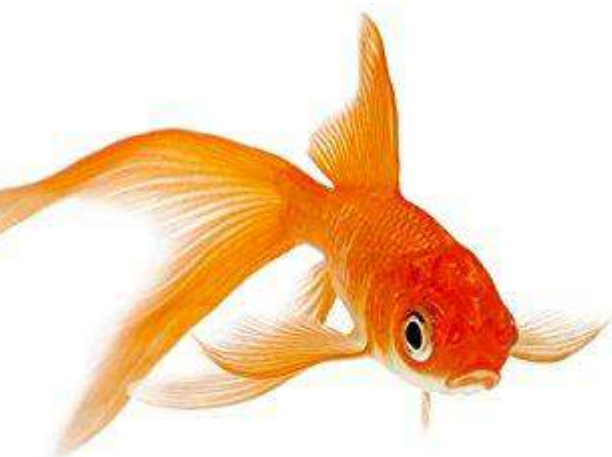

- Cotton wool like growths
- Fins or mouth eaten away
- Opaque slime patches
- White 'sugar grain' size spots
- Gasping or flicking
- Warped fins

50565 | IP Treat Disease Away 100ml

## Top tip...

...Fish disease is often caused by poor water quality. Use our Complete aquarium dip test kit to ensure your aquarium water is healthy.

Make tap water safe for goldfish

### What?

Chlorine and Chloramine are added to make tap water safe to drink. Tap water also contains heavy metals from pipework.

Goldfish fresh start removes the chlorine and other toxic compounds as they are harmful to fish and damage delicate skin and gill membranes.

Goldfish fresh start also instantly adds aloe vera which protects and heals fish skin and gills.

### When?

Use as part of your maintenance routine when adding new water to your aquarium, whether it be your fortnightly water change or weekly top up.

Make tap water safe

### What?

Chlorine and Chloramines are added to tap water to make it safe for humans to drink, tap water also contains heavy metals from copper pipework. Bioactive tapsafe plus neutralises the chlorine and heavy metals in the water as they are harmful to fish and damage delicate skin and gills.

### When?

Use whenever you add tap water to your aquarium:

- setting up new aquarium
- water changes
- evaporation top up
- when adding new fish to an aquarium

50ml • 125ml  
250ml • 500ml

50ml • 125ml • 250ml

Introduce new fish quickly and safely

### What?

Fish live in their own toilet; the waste they excrete remains in the aquarium and can build to poisonous levels or cause disease. Established filters contain bacteria, which break down the waste. Health problems often occur in new aquariums as the bacteria take weeks to establish. Fast Filter Start contains selected bacteria to rapidly start the waste breakdown cycle.

### When?

Use to kick start filters in a new aquarium and whenever the aquarium or filters are cleaned to re-establish bacteria levels.

55555 IP Treat Bioactive Tapsafe Plus 50ml

55103 IP Treat Fast Filter Start 125ml

55104 IP Treat Fast Filter Start 250ml

Create a clean  
aquarium  
with less work

### What?

Solid organic waste builds up in your aquarium and blocks up your filter media. It comes from fish excretion, excess food and dead plants. This sludge is unsightly and unhealthy, encouraging disease causing bacteria.

### When?

Use when unsightly sludge builds up in your aquarium. Use regularly to reduce aquarium and filter cleaning.

50ml • 125ml  
• 250ml

Cloudy water  
problem?

50ml • 125ml

### What?

However good your filtration system, there are often minute particles present which find their way through the finest filter media. These particles irritate fish gill membranes, stunt plant growth by filtering out light and ruin the enjoyment of seeing your fish in their full glory.

### When?

Use when your aquarium water is cloudy and as part of your maintenance routine to clear fine particles of waste.

Clean plants  
and ornaments

100ml • 250ml

### What?

Plastic plants and aquarium ornaments inevitably end up covered in unsightly algae and stains.

Ornaments and plastic plants can be soaked in a solution of Plastic plant & ornament cleaner to remove algae and stains.

### When?

Use when unsightly algae and stains build up on your plastic plants and ornaments.

Remove from aquarium and soak in the cleaner.

### Simple to use

- Dose using the measuring cup
- Simply add to 10 litre bucket of water and soak items to be cleaned

# Plant Care

Plant Food contains the right nutrients for plants to flourish without nitrates and phosphates. It ensures optimum plant growth without stimulating algae.

- Promotes lush, green growth
- Does not encourage algae
- 1 pump treats 20 litres, use daily
- Most effective when used with Interpet Liquid CO<sub>2</sub>
- For use in cold water and tropical freshwater aquariums only
- Harmless to filters and all species of fish, shrimp, invertebrates, and plants

Just like house plants, aquatic plants need plenty of carbon dioxide to flourish and survive. Plant CO<sub>2</sub> provides your aquatic plants with an additional boost of CO<sub>2</sub>, in an easy dose liquid.

Plant CO<sub>2</sub> ensures optimum plant growth, which also helps outcompete algae.

- Promotes lush, green growth
- Does not encourage algae
- 1 pump treats 20 litres, use daily
- Most effective when used with Interpet Liquid Plant Food
- For use in cold water and tropical freshwater aquariums only
- Harmless to filters and all species of fish, shrimp, invertebrates, and plants

55121	Liquid Aquarium Plant Food
55118	Liquid Aquarium Plant CO <sub>2</sub>

125ml

Clears green water fast

### What?

Excessive light or nutrients stimulate an unsightly and potentially dangerous algae bloom in aquariums, which can affect oxygen and pH levels, making the water highly alkaline and potentially dangerous for fish.

Green away clumps the individual suspended particles together so that they become trapped in the filter or sink to the bottom. It does not remove any algae which grows on fixed surfaces.

125ml

Get rid of string algae

### What?

Hair algae, whether it is green, black or brown, is an unsightly nuisance in your aquarium. It will grow on any surface and prevents plants from flourishing.

Hair algae thrives when there is excess light and nutrients available.

Anti hair algae makes key nutrients unavailable and starves the algae.

### When?

Use when unsightly hair algae is in your aquarium.

125ml

### What?

Ammonia is a lethal toxic waste product excreted by fish; bacteria in biological filters usually breakdown the toxic Ammonia into less harmful compounds. This process may occasionally break down and need help to chemically remove the Ammonia. The only way to detect Ammonia is by using a test kit, Ammonia levels should always be kept to zero.

Instantly get rid of toxic fish waste

Designed and manufactured in the UK by Interpet Ltd

## LIFE SUPPORT

### Lighting

Double Bright White,  
2 x 9 0.2w LED's, 36cm  
Single Blue Moon,  
6 x 0.2w LED's, 31cm

#### High performance dual LED lighting.

Efficient, long life span creates bright yet economical lighting from very low wattage LEDs.

##### Bright White for:

- lush plant or coral growth without encouraging algae
- attractive ripple effect

##### Blue Moon for:

- softer, more relaxed night time viewing

### Filter

Flow rate: 320 l/hr  
(70 gal/hr)  
3.3 Watts

#### Easy clean, effective, low voltage internal cartridge filter for a clear, clean, healthy aquarium.

1. High surface area bio cartridge acts as a mini sewerage treatment works, removing toxic fish waste.
2. Replaceable cartridge includes: Fine flax to trap fine waste. Carbon to remove dissolved dyes and organics, leaving crystal clear water.
3. UNIQUE Algae pad prevents unsightly algae.

##### Top tip...

Remember to service your filter monthly for fish health and a clear, clean aquarium.

### Heater

Heater 100 Watts

#### The renowned Interpet Deltatherm heating system with built in, easy adjust thermostat reliably keeps the aquarium water temperature stable.

##### Top tip...

Although known as 'coldwater' fish, goldfish actually thrive with a little heat, so use your Deltatherm heater, even with goldfish.

#### Low voltage power management system

Simple, safe and tidy. A unique, single low voltage power supply for lighting and filtration.

0385 Insight 64 Led Upgrade

0386 Insight Auto Feeder

0384 Insight Auto Timer

## WATER CARE

### Aquacare Reminder System

#### Integrated flashing reminder system.

Makes keeping a healthy aquarium easy, by ensuring you never forget essential aquarium care processes such as water changes or filter care.

##### Top tip...

Carrying out regular water changes helps ensure a healthy aquarium environment.

### Filter Start & Tapsafe

#### Essentials for a successful aquarium start-up.

Tapsafe - makes tap water safe for fishkeeping.

- Removes harmful chlorine and heavy metals.
- Adds essential bacteria and protective 'Aloe Vera'.

Filter Start - Kick starts the biological filter system by adding beneficial bacteria that work to remove harmful fish waste.

##### Top tip...

Always use Tapsafe when adding water to your aquarium.

Also available for the  
**Insight LED**

#### Auto feeder

Battery operated, automatic fish feeder for up to four programmed feeds per day.

#### Lighting auto timer

Easy-fit lighting timer sets your lighting to 10 hours on/14 hours off each day.

### INSIGHT UPGRADES:

The perfect add-ons to get greater results from your Insight aquarium

1509	Easy Read Thermometer with Sucker

### Unique flat heater

Compact Slim design for small aquariums

- Multi use positioning option
- Delta T Pre-set concept in all sizes – consumer ready units
  - Safe glass free design
  - 2 sizes - 7.5-15W (12-20ltr)
  - Free thermometer Included

1690 Deltatherm Flat 7.5w Heater

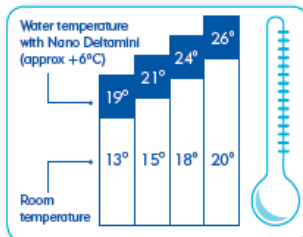

1691 Deltatherm Flat 15w Heater

### Flexible positioning

### Constant heat output

Deltatherm aquarium heater generates a constant heat output which increases the water temperature by (approx.) 6°C above the ambient room temperature. This makes it ideal for maintaining tropical fish and plants in a small aquarium.

### Keeps temperature at a tropical 25°C

- Available in 2 sizes (10W,25W)
- For aquariums up to 25L
- Compact design for flexible positioning
- Safe and durable with run dry protection sensor

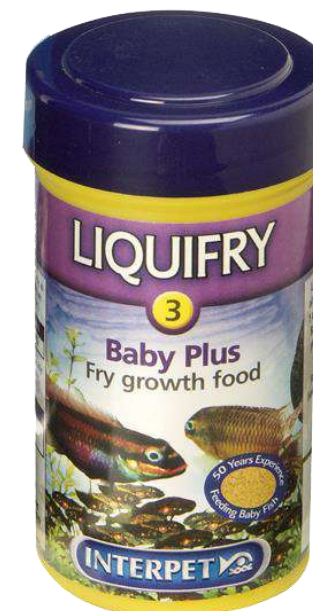

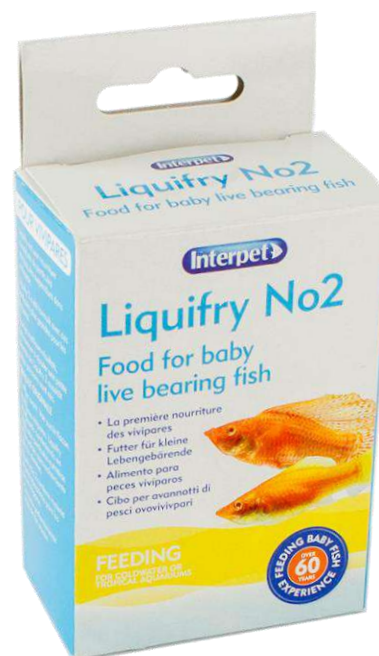

51528 Deltatherm Stat 10w Heater

51529 Deltatherm Stat 25w Heater

### Flexible positioning

## FEEDING solutions for baby fish

**LIQUIFRY NO. 1 & 2** Minute pre-soaked particles suspended in liquid ensure the fry get a good diet before progressing onto larger foods as they grow

**LIQUIFRY NO.3** Ideal for weaning young fish off liquid food onto solid food. Micro flake is the right size, with the correct high protein and oil levels for baby fish.

- |      |                                     |
|------|-------------------------------------|
| 0301 | Liquifry For Egg layers No.1 25ml   |
| 0302 | Liquifry For Livebearers No.2 25ml  |
| 0303 | Liquifry For Weaning Baby Plus No.3 |

## FEEDING solutions for holidays, food for fish and plants

**FREEZE DRIED FISH FOOD** Nutritious and delicious natural foods are gamma irradiated to ensure they are completely pathogen free prior to being freeze dried. They are an excellent treat to add to the diets of all coldwater, tropical and marine fish.

	Box	Tub
Tubifex	0430 x 5g	0432 x 30g
Brine Shrimp	0434 x 4g	0436 x 18g
Bloodworm	0438 x 4g	0451 x 20g
Krill	0441 x 5g	
Daphnia	0446 x 8g	0445 x 35g

**AUTO FEEDER** Ideal for flakes and granules, with a digital read-out and 'one-touch' feed button and a feed quantity regulator

0498 | Digital Auto Feeder

**FREEZE DRIED FOOD BLOCKS** Mineral food blocks that stabilise water quality whilst releasing freeze dried food over a period of time.

0460	Food Block Weekend
0461	Food Block 7 Day Holiday

- Stacked aquariums save space
- Education and support in accessible language

**Goldie**

**Professor Mo**

**Dr Sara**

**Shub**

# GOLD

55127

Gold Quick Clear rapidly clears cloudy water. Use it when your water appears murky and you can see tiny particles floating in it.

- Clears particles that ruin your view of Goldie's home, could irritate his gills or stop your plants from growing
- Works rapidly
- Made from safe and natural ingredients

55129

Gold Disease Safe is an all-in-one medicine that works on a wide range of illnesses. It is specially formulated to be effective but safe. If your Goldie is looking poorly, remove the activated carbon from your filter and quickly add a dose.

- All-in-one, fast acting medicine
- Treats all common fish health problems
- Safe and effective

55130

Made with mealworms, the Gold Worm Sticks are very similar to Goldie's natural diet and provide all essential nutrients to keep him healthy and happy for years.

- Mimics natural diet
- Tasty, nutritious recipe

# GOLD

55126

Gold Tapsafe makes tap water safe for your fish. Instantly removes bad chemicals and makes water clean and healthy.

- Removes chlorine and toxins from tap water
- Works instantly
- Added Aloe Vera soothes Goldie's delicate skin

55128

Clever Bio Bugs keep Goldie's water healthy and his home clean. A mix of helpful bacteria which boost your aquarium filter and help you with weekly cleaning.

- Boosts filters
- Cleans up waste

# GOLD

www.goldiesworld.co.uk

51706

Perfect home for baby goldfish for the first year of their life. It has a curved front face for perfect views of your goldfish and a flat lid with a convenient feeding flap.

The aquarium comes with an easy to use, super quiet 5 stage filter which ensures the best water quality for Goldie and a bottle of Tapsafe.

0429

Simple but quality aquariums for your goldfish, the Gold AquaPod LED Starter kits are quick and easy to set up.

Despite their affordable price, they are made of high-quality glass and come with all essentials to get you started - a 5 stage filter, a bright LED light and a bottle of Bioactive Tapsafe plus.

55133
